

# SALES INFORMATION

## NEW PRODUCT INFORMATION

Responding to a lot of requests from the end users, the relocation of Power Tilt & Trim Switch has been done on our Multi Function Tiller Handle.

NB: Also available in Beluga White

### ✓ Summary of Characteristics

- **Relocated PTT Switch**

PTT Switch is now located at the grip-end. This change will allow boaters to operate both PTT Switch and throttle in a hand at the same time.

- **Newly designed grip.**

By adding the anti-slipping curving on the surface of handle except the grip-end, it will help boaters instinctively to locate where the PTT Switch without looking.

- **Variable Idling System**

Considering wind and current, Variable Idling System will ease the boaters to select the best idling speed from 3-5 different rpm range, depending on model, by simply pressing the Key Switch.

### ✓ Parts No. for each model
